

# Quick Start Guide

## Getting Started

1

Check Parts List

2

Function Guide

Note: Please contact your vendor if you do not already have a data cable.

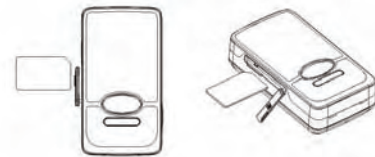

3

Please fully charge your device before using it for the first time.

4

Insert SIM Card

5

Once your device has been fully charged place the device so that it has an unobstructed view of the sky, lying face up, so it can obtain the initial GPS Fix.

6

Turn on the device by pressing the power button for 3 seconds. The power light will flash green while device powered on.

The GSM light will slowly flash green after device connected to GSM network.

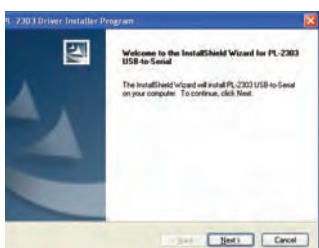

The GPS light will flash blue after device obtains GPS fix. You are ready to use your device now.

## Configuring Your Tracker

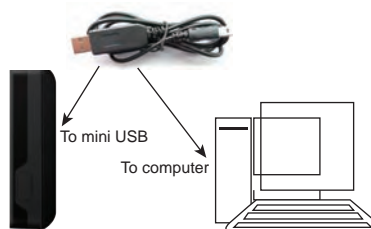

1

Find "PL2303\_Prolific\_DriverInstaller.zip" in the develop suit and install the driver for the appropriate USB Data Cable. If you have already installed the driver please move to step2.

2

Connect the device to your computer using the appropriate USB Data Cable. Note: The data cable is sold separately, please contact your vendor. A generic USB cable will not work with this device.

3

Find "Config Tool.exe" in the develop suit and use it to configure the settings of your device.
