Application Note:
GSM0000AN019

GSM/GPRS Network Configuration Worksheet
Revision 1.00

Enfora, Inc.
www.enfora.com

Objective:

The objective of this Application Note is to document the settings of your carrier's GSM/GPRS network. This will include APN (Access Point Name), voice settings, and IP settings.

All of Enfora's products are "unlocked," which means they can be used on any GSM/GPRS carrier's network. Because of this feature, it's necessary for the customer to gather the necessary configuration information from the carrier, such as:

- IP Addressing information
- Access Point Name (APN)
- User name and password (if applicable)
- SMS information

NOTE: You will need to get this data directly from your carrier.

Record all applicable configuration information on this worksheet, and use it for future reference.

This worksheet can be used with any Enfora GRPS or EDGE product.

GSM/GPRS Network Configuration Worksheet

<u>Voice Operations</u>
Is a voice plan enabled for the SIM? _____
What is the phone number to access voice mail? _____

<u>SMS Operations</u>
Is SMS enabled for the SIM? _____
